LOCAL ENGINE (viewer_app.py)

GET /api/search
FTS5 query → JSON

GET /page?doc=&page=
PyMuPDF renders that
PDF page → PNG (on demand)

POST /api/request
save session → 104th PDF

INDEX / CORPUS

viewer.db
FTS5 + metadata

E:\ PDF on disk
read-only source

DOCUMENT VIEWER PANE

rendered page image
(the actual manual page)

◀ prev / next ▶ + add to request

click a result → render its page → view it; navigate pages; add parts to the 104th sheet

☐ GUI input ☒ engine endpoint ☐ index / file ☐ viewer pane

Pages are rendered on demand (no pre-rendering) straight from the read-only PDFs — fast and storage-free. Fully offline.

Rule R1 — read-only corpus, additive. Rule R2 — diagram for this addition. Rule R3 — dark theme + PDF.
