

v0.96.0 — THE RESTRUCTURE: monolith → thin shell + features/ package

viewer_app.py 2,407 lines → ~330-line shell · domain logic moved verbatim into 9 modules · one error boundary · declarative routes

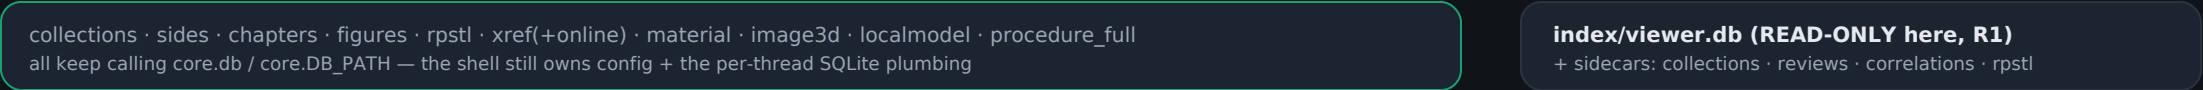

REQUEST LIFECYCLE (hardened shell)

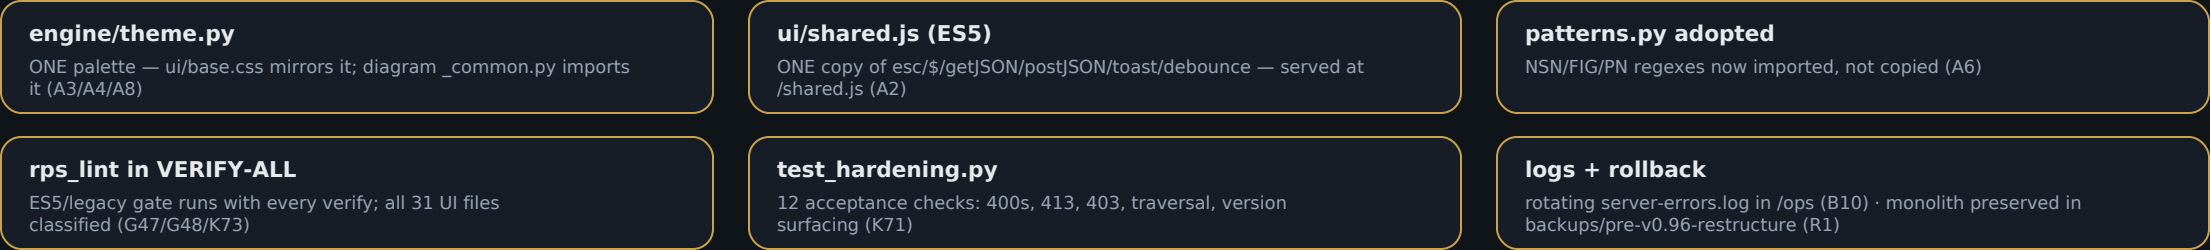

engine/features/ — WHERE THE MONOLITH'S LOGIC LIVES NOW (DI: each module gets `core` = the running viewer_app)

EARLIER EXTRACTIONS (unchanged, same DI)

FOUNDATION (dedup) + SAFETY RAILS shipped with v0.96.0

Rules: R1 backwards-compatible/rollbackable · R2 diagram · R3 dark+PDF · R4 changelog · R5 visual changelog · R6 append-only · verified: 75 regression + 59 route-smoke + 12 hardening tests green
