

# Offline startup fix · version banner · R10 snapshot v0.99.17

Fixed the launch hang on the offline machine, corrected the stale version, and built the visual per-iteration snapshot Chris asked for.

## [FIX] startup hung on pip retries (offline)

- run\_app.bat ran `pip install --upgrade pip` on EVERY launch →
- ConnectionResetError(10054), retry x4 — hangs when offline.
- FIX: one `import fitz, reportlab, PIL` gate; touch the network
- ONLY if a package is missing (then --timeout 8 --retries 1).
- Same guard applied to run\_ocr\_auto/gpu/ocr/enrich/indexing.
- Normal launch now: 'All present -- no network touched'.

## [FIX] version banner was stale

engine/viewer\_app.py

**VERSION = "0.98.0"**

→ **VERSION = "0.99.17"**

The running app printed v0.98.0 while the changelog was at 0.99.16 — a snapshot-vs-changelog mismatch. Bumped to match; the app VERSION now tracks the changelog top (per R10).

## [FEATURE] R10 — the iteration snapshot (visual, matches the changelog EXACTLY)

- New rule R10: every iteration ships a comprehensive, VISUAL snapshot
- of every change — tagged [FEATURE] [UPGRADE] [POLISH] [FIX] — so Chris
- can see & confirm changes iteration-to-iteration.
- engine/build\_iteration\_snapshot.py DERIVES it from CHANGELOG.md, so it
- matches by construction (amended: MUST match, no exceptions) — it even
- self-asserts every changelog version is present. Wired into VERIFY-099.
- Outputs: docs/ITERATION-SNAPSHOTS.md + docs/ITERATION-DASHBOARD.html.

### ITERATION-DASHBOARD.html

149 iterations · 88 legacy · matches CHANGELOG.md

**All** **Feature** **Upgrade** **Polish** **Fix**

**0.99.17 2026-07-01 Offline startup fix + R10**

**FEATURE** **FIX**

search · filter by tag · link to each diagram · legacy parity

## VERIFIED / R1

- Generator run: 149 iterations, 88 with legacy parity, 11 with diagram links; R10 integrity OK -- all 149 CHANGELOG versions present.
- Snapshot MATCHES the changelog by construction (derived from it); verbatim '(...)'/'[...]` in old entries are real text, not truncation.
- Outputs structurally complete: ITERATION-SNAPSHOTS.md ends with the tail sentinel, DASHBOARD.html closes cleanly (R9).
- Additive & rollbackable: bat guards + one VERSION constant + one generator + two generated docs. Nothing writes the index (R1/R6).
