Before operation

During operation

After operation

Weekly

“TABLE 2-1. PREVENTIVE MAINTENANCE CHECKS AND SERVICES. Interval: BEFORE, DURING, AFTER, WEEKLY. Item: engine oil level...”

+ intervals inferred: Monthly / Annually on continuation pages.

HOW / VERIFIED / R1

- `pmcs.find()`: FTS-match ('preventive maintenance checks' OR PMCS OR 'checks and services'); dedup by doc+page; infer interval from text.
- Vehicle filters on `documents.vehicle` LIKE — NOT the page body. A self-test caught the original body-FTS bug (vehicle isn't in the body) and it was fixed.
- Verified in-sandbox on a synthetic FTS index: HMMWV → 2 PMCS pages w/ correct intervals; wrong vehicle → 0; no-vehicle → all.
- `/api/pmcs` + `/pmcs` page + `□` in palette + Tools menu; `pmcs.py` in audit + VERIFY-099 + `verify_ui`. Read-only on the index (R1/R6).
