

Cheap-wins bundle — more R12 methods, no GPU, all feed the mechanic views v1.2.2

⚠ **cautions.py** \$3.9

- WARNING / CAUTION / NOTE / DANGER
- pulled as severity-ranked objects
- DANGER sorts first · cited to page
- /api/cautions + dossier card

SAFETY CALLOUTS

📄 **textquality.py** \$9.1

- Post-hoc OCR quality score 0..1
- garbage-char · vowel-less · stray-tok
- clean / suspect / poor flag
- flags callouts from bad-OCR pages

CONFIDENCE

📄 **pdfmeta** \$5.4 / \$5.5

- AcroForm fields (fillable IETMs)
- embedded files (CAD/CSV inside PDF)
- folded into /api/pdfmeta
- fitz API verified on synthetic PDF

Progress toward the self-standing repository (R12)

Catalog status now: \$3.2 units · \$3.6 leading-particulars · \$3.7/3.8 thread/MIL-SPEC · \$3.9 safety callouts · \$5.1/5.2/5.3/5.8 PDF outline/metadata/links/annotations · \$5.4/5.5 form fields/attachments — all 📄; \$4.9 Every value lands in the linkless Masterfile, dual-unit and confidence-flagged, corpus authoritative. Next cheap lanes: acronym expansion (\$3.10), header/footer strip (\$2.6); then borderless + cross-page tables (\$2.4/4.6/6.2/10.1).
