

Matching the onboarding modal to the 104th sheet header

Proposal & markup — the modal already collects every header field; this is about fidelity (order, labels, grouping) and one conflict. Decide before we build.

THE 104TH SHEET HEADER · source of truth

104TH ECC PARTS REQUEST SHEET

(FILL OUT ALL BLOCKS)

MECHANIC'S NAME (PRINT/SIGN):

BUMPER#:

FAULT:

TM:

UOC:

TECH STATUS:

ITEM NAME:

NSN:

QTY:

FIG#:

PART#:

(FEDLOG) UNIT PRICE:

AAC:

ARC:

x 6

MOTOR SERGEANT / SENIOR MECHANIC:

7 header blocks total (incl. footer). No DATE / UNIT / DODAAC blocks on this sheet.

PROPOSED MODAL · mirrors the header 1:1

Start a maintenance session

FIND A PART · search only — does not print on the sheet

What do you need? (part name · part # · NSN · 4-digit last-4)

PARTS REQUEST SHEET HEADER · fills the blocks at left

MECHANIC'S NAME (PRINT/SIGN)

BUMPER#

required

FAULT

required

TM

UOC

TECH STATUS

MOTOR SERGEANT / SENIOR MECHANIC

Live mini-preview of the header updates as you type (what you fill = what prints).

RECOMMENDATIONS

1 · Exact labels & order

Modal rows match the sheet 1:1: Mechanic → Bumper|Fault → TM|UOC|Tech → Motor sergeant. Use the sheet's exact wording.

2 · Group + separate search

Put the 7 header fields in one labelled group; set the search/express field visually apart (it never prints).

3 · Honor 'FILL OUT ALL BLOCKS'

Conflict today: Simple mode hides UOC/Tech/Motor — but they're header blocks. Fix: always show header fields; Simple only hides per-item FEDLOG.

4 · Live header preview

Render a small replica of the sheet header inside the modal that fills in as you type — true visual parity.

5 · Required = Bumper# + Fault

Keep just those two required (most critical); mark the rest 'recommended' so a quick request isn't blocked.

6 · Don't invent fields

This sheet has no DATE/UNIT/DODAAC — we won't add blocks it doesn't have. Stays a faithful replica (R1).
