

Tech Status — derived from fault + part, confirmed before the sheet — built

v0.17.0 · PMCS 'Not Fully Mission Capable If' (cited) + prior history · mandatory confirm gate · full codes. Additive (R1).

Confirm equipment status

NMCS

The fault matches a PMCS 'Not Fully Mission Capable If' criterion — a deadlining fault. Parts are on order, so supply (NMCS) is suggested. Review the cited criteria and confirm.

TECH STATUS — required to generate the sheet *

NMCS

FMC fully mission capable · PMCM/PMCS partially (maint/supply) · NMCM/NMCS non-mission-capable (maint/supply). You confirm — the app never decides readiness on its own.
