WHAT HAPPENS WHEN YOU SWITCH

⚙️ Settings (preset or fine-tune)

▼

applySettings()
maps choices → body classes

▼

body.sz-xl · body.den-compact · body.simple · MATCH_ANY · viewer defaults
CSS + 2 JS vars — that's all a layout is

▼

localStorage 'viewer_settings'
per device · legacy keys migrated · Reset restores default

▼

INVARIANT CORE — untouched

No change to /api/search, /api/request, the index, or the request payload.
The end-to-end flow (modal → search → cart → tech gate → 104th PDF) runs identically. A startup self-check confirms the core controls exist after every layout apply.
