

PUB LOG enrichment — RUN on your live index

v0.24.0 · The 16 GB FLIS Reading Room catalog ingested into viewer.db (NIIN-keyed), append-only & cited. Index verified intact (39,683 docs).

REAL RECORDS NOW IN YOUR OFFLINE INDEX (cited)

- 6115-01-036-6374 → GENERATOR SET, DIESEL ENGINE · P/N MEP007B · CAGE 30554 · AAC V · \$35,140.51 · freq 50–60 Hz, three-phase
- 5985-00-933-2197 → MAST · P/N AB903G · nested height 72.000 in · base diameter 4.250 in (telescoping)
- 5820-01-043-6476 → MODEM, COMMUNICATIONS · P/N SM-D-777153 · CAGE 80063 · \$89,969.00

Cart now auto-fills the authoritative part # and AAC onto the 104th; characteristics feed Tier 2.5.

COVERAGE & NEXT STEP

468 of ~501 cover/end-item NSNs were matched. The thousands of individual RPSTL part NSNs aren't extracted on viewer.db yet — run `parts` on the full index, then re-run enrich --publog-dir to fill those too. Productized as enrich_flis() for monthly re-runs.

SAFE

Written with TRUNCATE journaling; the interrupted first attempt (slowed only by a full-DB integrity check) committed nothing; the index re-reads cleanly with all 39,683 docs. Additive (R1), append-only (R6).
