

Overnight batch — what got done (v0.25.0)

All on your live full index, additive (R1) & append-only (R6). One-click rollback ready. Index verified intact: 39,683 docs · 1,848,465 pages.

✓ Parts on the FULL index 227,908 records · 45,068 distinct part NSNs extracted from 40,793 RPSTL pages. done	✓ FLIS enrichment — whole catalog 41,701 NSNs: 44k names · 41k part#/CAGE · 31k dimensions · 40k AAC+price+date. done
✓ Supersession · vintage · multiple-choice FLIS year tag (e.g. 'FLIS 2013'), current/interchangeable NSN cross-ref, multiple part# choices — on the cart. done	✓ 2D→3D representative viewer Offline rotatable solid scaled to FLIS dimensions; features listed verbatim & cited; 'not a CAD model'. done
✓ Search speed Indexes + ANALYZE refreshed; full-text ~45 ms over 1.85M pages. done	✓ Rollback (R1) run_rollback.bat (dry-run default; /yes to apply). Removes enrichment+parts; keeps docs/pages/OCR. ready
🕒 OCR to 100% Multi-day GPU job — cannot finish unattended here. Pipeline ready: run_ocr_gpu.bat. Re-run parts+enrich after. your GPU	

WHEN YOU WAKE UP

Everything is live and searchable. If you want to undo any of it: dry-run run_rollback.bat to see exactly what it removes, then run with /yes. To finish OCR: run_ocr_gpu.bat on the GPU box, then re-run parts + enrich to extend the catalog enrichment to the newly-readable NSNs.
