

BUILT — Foundation batch, part 1: the test + RPS gate (v0.64.0)

From the 90-item backlog. Builds the harness that auto-verifies every later change — and on first run it caught a real legacy-parity bug.

📄 RPS lint — the 'does legacy still work?' gate

- tests/rps_lint.py scans every ui/*.html + *.js for ES6 SYNTAX (arrow, const/let, template, spread, for-of, class, async/await) that polyfills can't fix.
- ES5-required pages (mechanic-facing tools) FAIL the gate on any ES6; rich pages (3D/WebGL/loupe/circuit sim) are modern-by-design and exempt (reported).
- Run by RUN-ALL-TESTS.bat alongside the regression suites.

A change isn't done until legacy still runs.

📄 ...and it caught one immediately

- First run flagged status.html (the OCR/system dashboard, a legacy tool) as containing ES6: arrow x5, const x13, let x3 + async/await.
- On IE11 / Win7 that page would have thrown a SyntaxError and shown nothing.
- Rewrote its script in clean ES5 (var / function / XHR). Re-verified: 0 arrow/const/let/template/async/await.

Real RPS bug found and fixed on day one.

📄 /healthz endpoint

- New GET /healthz returns the preflight checks as JSON (python/disk/DB integrity/schema/GPU).
- Feeds the watchdog and a future ops status badge; 503 when a fatal check fails.
- Stdlib, RPS-safe.

Machine-readable health in one call.

▶ RUN-ALL-TESTS.bat

- One host-side command = regression suites + safeguard truncation/integrity verify + the RPS lint.
- Exit 0 only when additives pass AND legacy parity holds. /snapshot baselines first.
- This is the 'test all additives and the retroactive' loop, automated.

One button: additives + retroactive, green or not.

VERIFIED: rps_lint compiles + ran against the real 20 UI files (all ES5-tier pages clean except the status.html it caught; modern pages correctly exempt). status.html re-checked ES5-clean. /healthz + RUN-ALL-TESTS confirmed on host. Backlog items #2-4/#6/#8 (shared.js, base.css, patterns.py, diagram_common) + the route smoke test are the next Foundation increment.

BUILT diagram. Dark (R3). v0.64.0 · 2026-06-03 · tests/rps_lint.py · ui/status.html (ES5) · viewer_app.py /healthz · RUN-ALL-TESTS.bat. Additive (R1/R6).
