

Streamlined image search (v0.85.0)

Navigate to a TM page -> click an NIIN/NSN/part# -> pick the matching result -> see figure / schematic / 3-D, in a side drawer.

Page highlighting (both ends)

The searched number is boxed on the current page when you click it; the resulting part is boxed on the figure/schematic page when you open it — so you always see where the information lives.
